

Tobin R. Overdorf

President/MS, MBA

Professional Profile

Mr. Overdorf has over 20 years of experience in the fields of marine biology, ecology, physiology, environmental science, contamination, estuarine restoration, public speaking, and project management. He has both public and private work experience throughout the Southeast United States and into the Caribbean. His professional experience includes regulatory review, personnel oversight, budget tracking, compliance and preparation of federal and state regulatory permits for both public and private sector clients. He is an FDEP certified Stormwater Inspector and federally certified under the HAZWOPPER certification process.

Experience

20 years – marine biology, ecology, environmental science, research, presentation and project management

Project Experience

Deep Horizon Spill Response, Florida Keys – Monroe County

- Selected to coordinate the State, Federal, and local response to reports of oil spills (sheens, tar balls, or floating crude) within the Florida Keys and the Florida Keys Natural Marine Sanctuary. Completed SCADD training with the US Coast Guard, Sanctuary Staff, FDEP, and local law enforcement as part of the effort. Coordinated the first responders, assessments, and cleanup coordination of any identified oil incidents as a result of the Deep Horizon accident.

Sailfish Regatta - Martin County

- Coordinating the first successful permitting effort of an inshore high speed boat race in the Indian River Lagoon after 16 years. Gained approvals from 12 separate State/Federal agencies, coordinated with two US Congressmen, conducted USFWS mandated manatee and sea turtle observation from both fixed and airborne operations. Conducted pre and post seagrass surveys of the race course. Completed US Coast Guard Permitting and coordinated with local, state, and Federal law Enforcement during and after the event.

The Tesoro Club, Residential PUD – St. Lucie County

- Completed environmental assessment, State and Federal wetland mitigation permitting, USFWS permitting, Army Corps permitting and compliance for the 1,000 unit residential golf community. The project included an ASTM-E Phase I site assessment, bald eagle monitoring, habitat conservation plans, wetland delineation, wetland creation, wetland restoration, UMAM analysis, long term budget projections, CDD formation, exotic

removal, land management, gopher tortoise surveys, gopher tortoise relocation, golf course construction, golf course redesign, IQ water installation, controlled burning, NPDES compliance, plant installation, certification, and POA turnover.

Education

Florida Atlantic University

- Environmental MBA
- Master of Science in Biology

University of Rhode Island, Kingston, RI

- Graduate Studies in Zoology

Union College, Schenectady, NY

- Bachelor of Science in Biology (Honors)

CERTIFICATIONS AND TRAINING

- Ashton Biological Preserve Gopher Tortoise Management and Monitoring
- Qualified Stormwater Management Inspector- Inspector number 12907
- Florida Uniform Mitigation Assessment Training 2005 and 2010
- Hydric Soils Training 2006
- PADI/NAUI Certified
- SCADD Certified 2010
- HAZWOPPER 40 Hour Certification

PROFESSIONAL AFFILIATIONS

- Treasure Coast Regional Planning Council, Gubernatorial Appointee
- Florida Small Business Regulatory Advisory Board, FL Senate Appointee
- National Association of Environmental Professionals (NAEP)
- National Association of Mitigation Bankers
- Sigma Xi Research Foundation
- Leadership Florida, Class 26
- FAU Regional Advisory Board
- Treasure Coast Wildlife Foundation
- Trustee, Torrey Pines Institute for Molecular Studies (TPIMS)
- Seacoast Bank Regional Advisory Board
- Martin County Economic Council BOD
- Okeechobee & St. Lucie County Economic Council, Member
- Comprehensive Economic Development Strategy Committee (CEDS), County Appointed Position
